

# HyattCreative

Exterior Home & Garden Design

## Aspirational goals:

1. Achieving a carbon-neutral or even carbon-negative business operation by reducing greenhouse gas emissions from our operations, supply chain, and products or services, and by investing in renewable energy projects or carbon offsets.
2. Achieving zero waste by reducing, reusing, and recycling our waste streams, composting organic materials, and encouraging our clients to adopt sustainable waste management practices.
3. Promoting biodiversity conservation and restoration by incorporating native plants and wildlife habitats in our landscape designs, protecting and restoring degraded ecosystems, and collaborating with local conservation organizations.
4. Promoting sustainable water management by designing water-efficient landscapes, harvesting rainwater, and promoting responsible water use practices.
5. Advancing social sustainability by promoting equitable access to green spaces, promoting environmental justice, and supporting community-based initiatives that enhance the well-being of people and nature.
6. Leading innovation in sustainable landscape design by exploring and adopting new technologies and best practices that enhance sustainability and reduce environmental impacts.

**By setting aspirational goals, Hyatt Creative Design can continuously improve its sustainability practices and make a positive impact on the environment and society.**
