### **Environmental Preferable Purchasing Plan for Hyatt Creative Design**

At Hyatt Creative Design, we are committed to promoting sustainability and environmental stewardship in all aspects of our business operations, including our purchasing practices. To this end, we have developed an Environmental Preferable Purchasing Plan (EPPP) to guide our procurement decisions and ensure that we prioritize eco-friendly and sustainable products and services.

**Our EPPP is designed to align with our broader environmental policies and practices, and it focuses on five key areas:**

1. **Sustainable Materials:** We prioritize purchasing products made from sustainable materials, including recycled content, biodegradable or compostable materials, and sustainably harvested wood.
2. **Energy Efficiency:** We prioritize purchasing energy-efficient products, such as lighting and appliances with ENERGY STAR certification.
3. **Non-Toxic Products:** We prioritize purchasing products that are free of harmful chemicals and toxins, including cleaning products, fertilizers, and pesticides.
4. **Local Sourcing:** We prioritize purchasing products from local suppliers whenever possible to reduce transportation emissions.
5. **Social and Environmental Responsibility:** We prioritize purchasing products from companies that prioritize social and environmental responsibility in their operations and supply chains.

**To ensure that our EPPP is effectively implemented, we have established the following guidelines:**

- All purchasing decisions must be guided by our EPPP and must prioritize sustainability and environmental stewardship.
- All purchasing decisions must be reviewed and approved by our sustainability team to ensure that they align with our EPPP and broader environmental policies and practices.
- We will regularly review and update our EPPP to ensure that it remains aligned with our sustainability goals and the latest environmental best practices.

**We believe that our EPPP is a critical component of our commitment to sustainability and environmental stewardship, and we are dedicated to implementing it effectively in all aspects of our business operations. By prioritizing environmentally preferable products and services, we can make a meaningful contribution to a more sustainable future for all.**
