

Pallet Recycling

As a result of Berje's Onsite Production we generate approximately 5,200 Pallets+/234,000+ Lbs. of Wood/Lumber.

None are disposed of for waste.

Approximately 100 waste pallets are produced each week by Berje.

These are older pallets with imperfections that do NOT meet Berje's high standard for Customer Pallets.

Berje has worked with a number of local trucking companies that pickup these pallets for alternative use.

This is a free Pallet Program that Berje created to avoid pallet disposal/waste.

In the event we find ourselves with excess pallets we will also work with local pallet companies who will rework/make repairs to the pallets for future use.

If a pallet cannot be reused they will be turned into Mulch
