

Container Recycling

Version 2022

As a result of Berje's Onsite Production we generate approximately 45,000+ containers.

None are disposed of for waste.

Through Berje's local Recycling partnership with Kearney Steel each year approximately 125+ trailers of containers make a short 20 minute trip for their next stage in life.

Scope

Closed Head Drums Become Open Head Drums. Steel Containers that can't be turned into other containers are recycled and later reformed

Plastic is ground down and later reformed. Fiber is crushed, bailed and recycled for future use.

Nothing is wasted.

45,000+ containers will find use once more!
